ROBUN

Japanese author Kanagaki Robun wrote the 1872 book 西洋料理通 (The Expert on Western Cookery) which introduced European barbecue to Japan, now known across Asia and the World as Yakiniiku: small pieces of grilled meat. He moved onto journalism and satirical commentary, leading to the first recognisable Manga magazine.

Robun is our tribute to him.

Sake is a traditional Japanese alcoholic beverage made from rice, koji, and water. Alcohol may also be added. Its classification is based on ingredients quality and rice milling rate.

It is not exactly known when people began making sake in Japan. However, it is believed that an analogous drink was already being made in the Yayoi period (300 BC-250 AD) when rice cultivation was brought from China to Japan.

Fine sake is similar to wine in its potential for serious gourmet appreciation. Often fruity essence dominates, other times rice based, grainy flavours are prevalent.
